

User Settings

The user profile will be retrieved during the setup. Once entered, it will be automatically considered during the installation of following CATALOG versions. You can display the user settings window by clicking on the **'User Settings'** symbol in the tool bar. You can specify and change various basic user settings, such as country settings, language selection, entry of personal data and your VAT number here.

Article Search

Product Section

Select the required product section by clicking on the respective symbol in the tool bar:

Vehicle selection
(Passenger Cars and Commercial Vehicles)

Engine selection

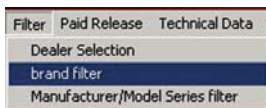

Universal article selection
(Universal articles, standard parts and workshop equipment)

Axle selection

Once a search is complete and you wish to start a new article search, start the search again by clicking on the respective symbol for the required product selection.

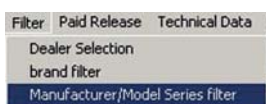

Filter Settings

Under the menu item **'Filter > Brand Filter'** you can select your preferred parts brands to be then shown at first glance in the brand of product group selection.

A click on the button **'All Brands'** cancels the **brand filter** function and then shows all other brands contained in TecDoc.

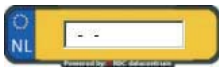

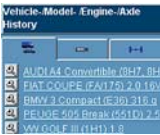

Via the new Manufacturer / Model Series filter under the menu item **'Filter > Manufacturer / Model Series filter'**, you can restrict the list of manufacturers and model series in the vehicle selection, the motor selection and the axle selection.

This symbol points to an **active Manufacturer / Model Series filter** at the vehicle selection.

This symbol indicates that **no Manufacturer / Model Series filter was set**.

Vehicle Selection	There are a number of different options available to select a vehicle:																																			
<p>Manufacturer/Model Series</p>	<p>Selection through identifying the vehicle manufacturer and model series.</p>																																			
<p><input checked="" type="checkbox"/> PC <input type="checkbox"/> CV</p>	<p>All manufacturers of passenger cars and commercial vehicles are usually listed together with all their model series. Should you wish to see only passenger cars, please de-activate the CV check box.</p>																																			
<p>ID Code</p>	<p>Selection via the key numbers on the vehicle registration papers</p>																																			
<p>Engines</p>	<p>Selection via the vehicle engine code.</p>																																			
<p>Type Description</p>	<p>Selection via vehicle type or model series description code (e.g. 'Golf', 'A Class', etc.)</p>																																			
<p>Model</p>	<p>Selection made via vehicle manufacturer model description code (e.g. '1HX', '8D2', '124.023', etc.)</p>																																			
<p>Numberplates</p> 	<p>Only with country setting Netherlands or Europe!</p>																																			
<p>cartes grises</p> 	<p>Only with country setting France or Europe!</p>																																			
	<p>The magnifying glass button shows all details of the selected vehicle, engine or axle. It can also be used to initiate a search at certain points.</p>																																			
	<p>This symbol in the tool bar activates the field for an expert search, enabling you to search with additional parameters such as engine output, capacity, year of construction, etc.</p>

Assembly Group Selection

Select the assembly group of the required article with a click on the respective symbol.

You can also open the assembly group by double-clicking on the '+' symbol.
A single click on the '+' symbol opens the sub-menus of a node. Once you have identified the required assembly group, please double-click on it to open the manufacturer selection.

After having clicked on an assembly group symbol, you can return to the search tree and the main area of the assembly selection by clicking on the '**Reset**' symbol.

Manufacturer / Brand Selection

You can sort the manufacturer list according to brand names by clicking on the column header '**Brand**'.

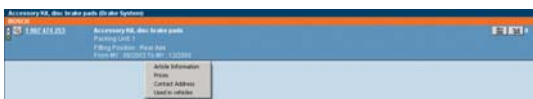

You can sort the manufacturer list according to product groups by clicking on the column header '**Product Groups**'.
A click on a brand or a product group will open the article overview window for the selected item.

Click on the '**Back**' symbol to return to the assembly group selection.

Article Overview

When placing the cursor on the article number, it will turn into a hand symbol. Clicking on the article number, a context menu will appear with a list of all available detail information for this article. Click on an item in the list to view that information.

You can also access the article detail information with a single click on the magnifying glass symbol or a double-click on the article number.

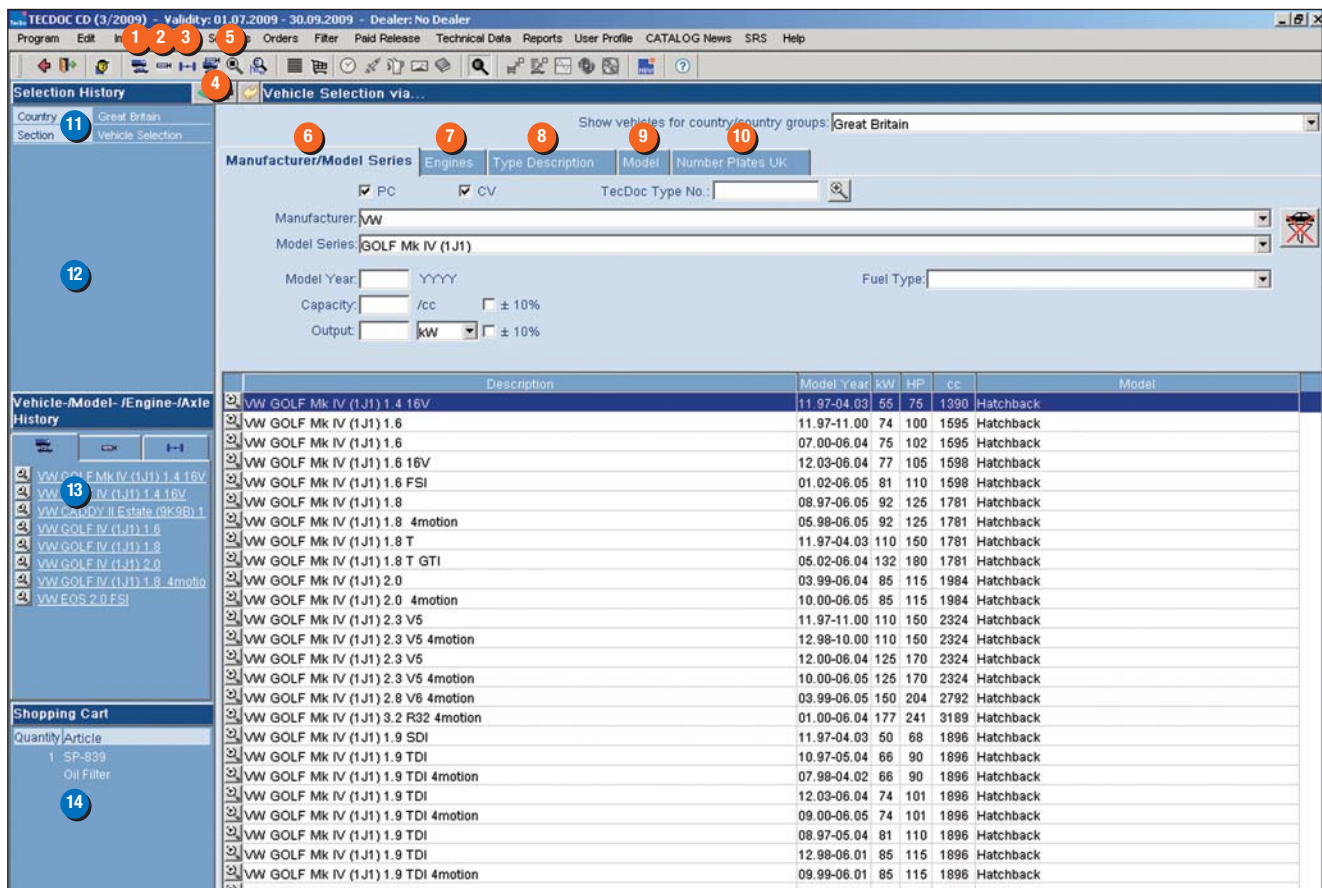

With a click on the '**Back**' button, you will return to the manufacturer selection.

Search modes: how to search in the TecDoc System

- 1 via the vehicle selection
- 2 via the engine selection
- 3 via axles
- 4 via the universal article selection

The „Universal Article Selection“ contains articles, which are not linked to a specific vehicle, i.e. paints or workshop equipment.
- 5 Article Direct Search

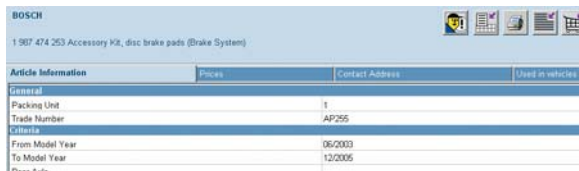

When a part number is entered into the Article Direct Search function, regardless of being an OE number or a trade number, all articles cross-referenced to this number will be displayed (also the parts of other parts manufacturers).
- 6 via the vehicle manufacturer
- 7 via the engine code
- 8 via the type description
- 9 via the model
- 10 via country specific identification number
- 11 information on country and language settings
- 12 the currently selected vehicle market
- 13 previously selected vehicles/engines/axles
- 14 current order list

The screenshot shows the TecDoc CD (3/2009) software interface. The main window is titled "Vehicle Selection via..." and contains several search filters and a results table. The filters include Country (Great Britain), Manufacturer (VW), Model Series (GOLF Mk IV (1J1)), Model Year, Capacity, and Output. The results table lists various Volkswagen Golf Mk IV models with their respective specifications.

Description	Model Year	kW	HP	cc	Model
VW GOLF Mk IV (1J1) 1.4 16V	11.97-04.03	55	75	1390	Hatchback

Article Details

Click on the tabs to view the available detail information. You can also click on the magnifying glass symbol in the **'for use in vehicle'** window to view vehicle details. Further information on the use of the article in a specific vehicle is shown under **'Criteria'** when the vehicle is selected.

An article can be added to a checklist by clicking on the **'Checklist'** symbol. Once an article has been added to the checklist, this symbol will no longer be visible.

You can place an article into the shopping basket by clicking on the **'Shopping Basket'** symbol. Each further click on the shopping basket symbol will increase the number of this article in the shopping basket.

You can create a note on a certain article by clicking on the **'Note'** symbol. If you are running the TecDoc CATALOG in a network environment, the note will also be available to all other users.

You can send messages to TecDoc on incorrect CATALOG information by using the error fax function; the function is activated by clicking on the **'Error Fax'** symbol.

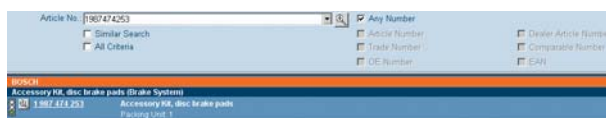

You can return to the Article Overview window by clicking on the **'Back'** button.

Article Direct Search

You can access the article direct search function by clicking on the **'Article Direct Search'** symbol in the symbol bar.

Activation of the **'Similar search'** box will also display articles, that contain the required number as part of their reference.

Deactivation of the **'Any number'** box enables the search according to specific number types, such as 'Article Numbers', 'Trade Numbers', etc.

Additional Information

	<p>Repair times Calculation with automatic combined calculation for reference time units for wear, repair and maintenance work.</p>
	<p>Maintenance services / data Maintenance, inspection and service information according to vehicle manufacturers' specifications. Vehicle-specific job lists, service times recommended by the manufacturer, lists of spare parts required and important repair instructions e.g. regarding timing belt replacement.</p>
	<p>Technical Data Technical repair and adjustment data according to the original specifications of the manufacturers in the areas: General vehicle data, ignition systems, lubricant specifications, filling levels etc.</p>
	<p>Technical manuals Repair manuals with detailed information on interactively linked subjects: Engine – power transmission – chassis – electrics – bodywork – engine management – EOBD – etc.</p>

Internet Update for short notice changes

	<p>When opening the catalogue for the first time, you will be asked if you would like to search for any available updates and in which time frame you would like to be reminded to search for internet updates. Generally, you can start an internet update via 'Import > Internet update' at any time. The exclamation mark indicates a new update, which you have yet to download.</p>
